

EarthWalk Hardwire Network Package

This multifaceted network option provides integrated 10/100/1000 Ethernet Switching and CAT6 Ethernet cables alongside the DC power cord in each laptop storage slot, which (when connected to a laptop) allows for an organized hardwired network connection. This package allows network administrators to facilitate laptop maintenance such as installation/re-imaging of laptop operating systems as well as software updates.

Why put up with a mess of wires?

- Integrated hardwired 10/100/1000 switching
- Dedicated Ethernet (CAT6) cable in each laptop slot
- Allows for updates and/or re-imaging via network broadcast while the laptops are safely stored inside the EarthWalk labs/carts*
- Custom integration packages available

* NOTE: To utilize this feature the laptops used in the mobile lab/cart system must be capable of Wake-On-LAN (WOL) with the lid closed. Check with your laptop manufacturer to verify WOL with lid-closed capability.
