

EarthWalk eCharge6 Locker

Rugged 6-unit charging locker

NEW PRODUCT!

EarthWalk's eCharge6 locker will securely store and charge up to six devices in lockable compartments.

The system includes a secure charging locker with 6 individually lockable compartments, and your choice of 6 pre-wired USBC to USBC 3.1 or Lightning cables.

WHY eCHARGER6?

- ✓ Multiple units can be stacked to create a charging center
- ✓ 16 & 20 AWG solid steel construction
- ✓ 65W prewired AC adapters included
- ✓ Can be used with laptops, Chromebooks and tablets
- ✓ Compartments have user-set, one-time-use lock combinations

Features:

- Made in the USA with 16 & 20 AWG solid steel construction
- Input power: 110V-220V AC 50/60hz
- Six (6) individually lockable storage compartments with user-set, one-time-use lock combinations
- Pre-wired charging cables—can be configured with USBC or Lightning cables
- Multiple units can be stacked to create a charging center

U.S. power cord included

Width: 38.7 cm / 15.25"
 Depth**: 48.2 cm / 19"
 Height: 30.5 cm / 12"

** Optional*

*** Shallower than locker to allow room for base moulding*

CONFIGURATION OPTIONS

Charging Systems

AC Smart Bar

For budget-minded consumers, EarthWalk labs can be configured with AC power outlets in each storage compartment for use with each device's AC adapter. But this is no basic power bar: We have staggered the sockets in a zig-zag formation, ensuring that adapters will not block other sockets.

Pre-Wired Solutions for USB Type-C

The latest standard in charging portable devices, we can pre-wire your carts and stations with our certified USBC-PD adapters or you can supply us with your existing AC adapters—either way we'll take care of the wiring headache for you. Literally plug-n-play as soon as your order is delivered to you. Combine USB-C with our AC-SMART system and get managed charging power for all of your devices from a single power cord, quickly charging all devices and eliminating circuit overload.

HE-PD—High Efficiency USBC-PD Charging System*

HE-PD is a pre-wired USBC-PD charging solution featuring a high-efficiency central power supply system with six USBC-PD auto-sensing, multi voltage (5V,9V,12V,15V) charging ports. Additional HE-PD systems can be integrated to increase system capacities. Pre-installed USB-C or Lightning data cables in each storage compartment make deployment and support convenient.*
