

EarthWalk HE-PD65 PowerHub Charging System

Pre-wired integrated USBC-PD

EarthWalk's HE (high-efficiency) pre-wired PowerHub 65 charging system provides simultaneous charging power to USB-C devices at up to 65 watts per device. It features adapter-free USB-C PD charging connections in the front of the cart or station, with cable management in the back. This system offers simultaneous battery charging, resulting in lower energy costs and balanced charging for all devices. Being pre-wired and ready to deploy means no wiring headaches for you.

HIGHLIGHTS

- Plug-n-Play: Ready to use immediately with no setup required
- Integrated USB-C PD System: Centralized power supply and intelligent power distribution.
- High-Power Charging: Delivers up to 65 watts per port, suitable for laptops and rapid charging of USB-C devices.
- Certified USB-C Cables: Equipped with E-chip for safe and reliable charging.
- Smart Voltage Detection: Auto-sensing technology for multi-voltage detection (5V, 9V, 12V, 15V, 20V).
- Energy Efficiency: Achieves up to 85% operational energy efficiency.
- Intelli-Charge System: Reduces heat during charging, extending battery lifespan.
- Safety Certified: Complies with FCC, CE, and UL ratings for electrical power systems.
- Balanced Charging: Simultaneous charging of all devices without the need for AC adapters, timers, or switches.
